

# Oft Foiltone

The Foiltone TS cold-foiling system for retrofit to sheet fed Lithographic printing presses from 74cm to 162cm.

The system fits on one unit of the press and will apply cold foil up to full sheet size at normal press running speeds.

The Foiltone TS system is colour coordinated and profiled to match the host press.

The system includes all the foil save features and touch screen technology of our Foiltone FS systems. This new design also enables foil rolls up to 15,000m to be used so improving press efficiency

**Additional benefits include:**

Neat foil path allowing full access to all other print units.

Easy to use Operator touch screen for general settings and commands.

Increased clearance allowing for larger foil roll diameters.

**Optional:**

Differential chucks and tension control system for running up to 6 rolls.

For general inquiries and further information about Foiltone TS and all our other systems please contact us:
